

Android: Gmail App (Exchange)

1. Launch the Settings app on your device.
2. Once it launches, tap on **Accounts**.
3. Tap on **Add Account**.
4. Select **Exchange** as the Account Type

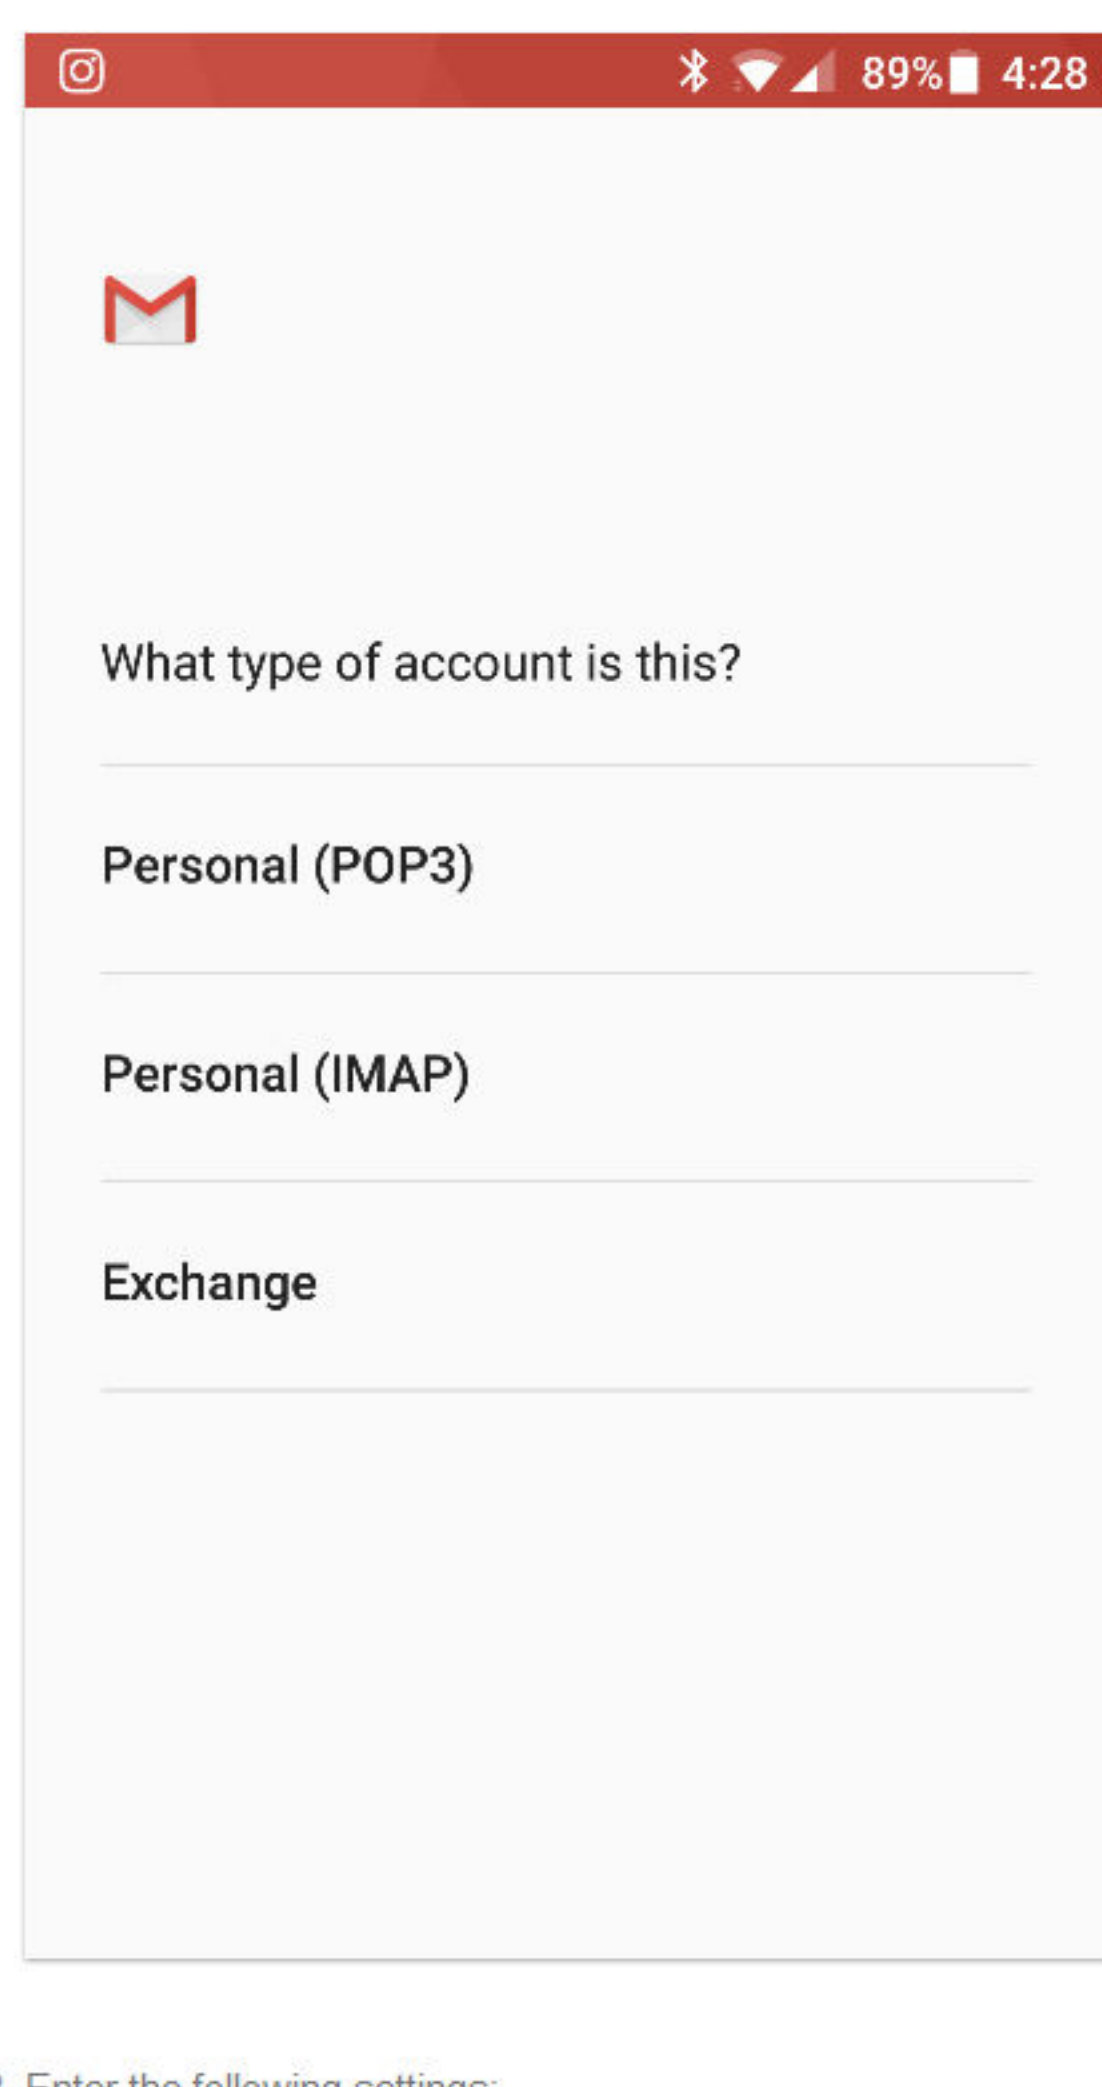

5. Enter your email address

6. Tap **Manual Setup**

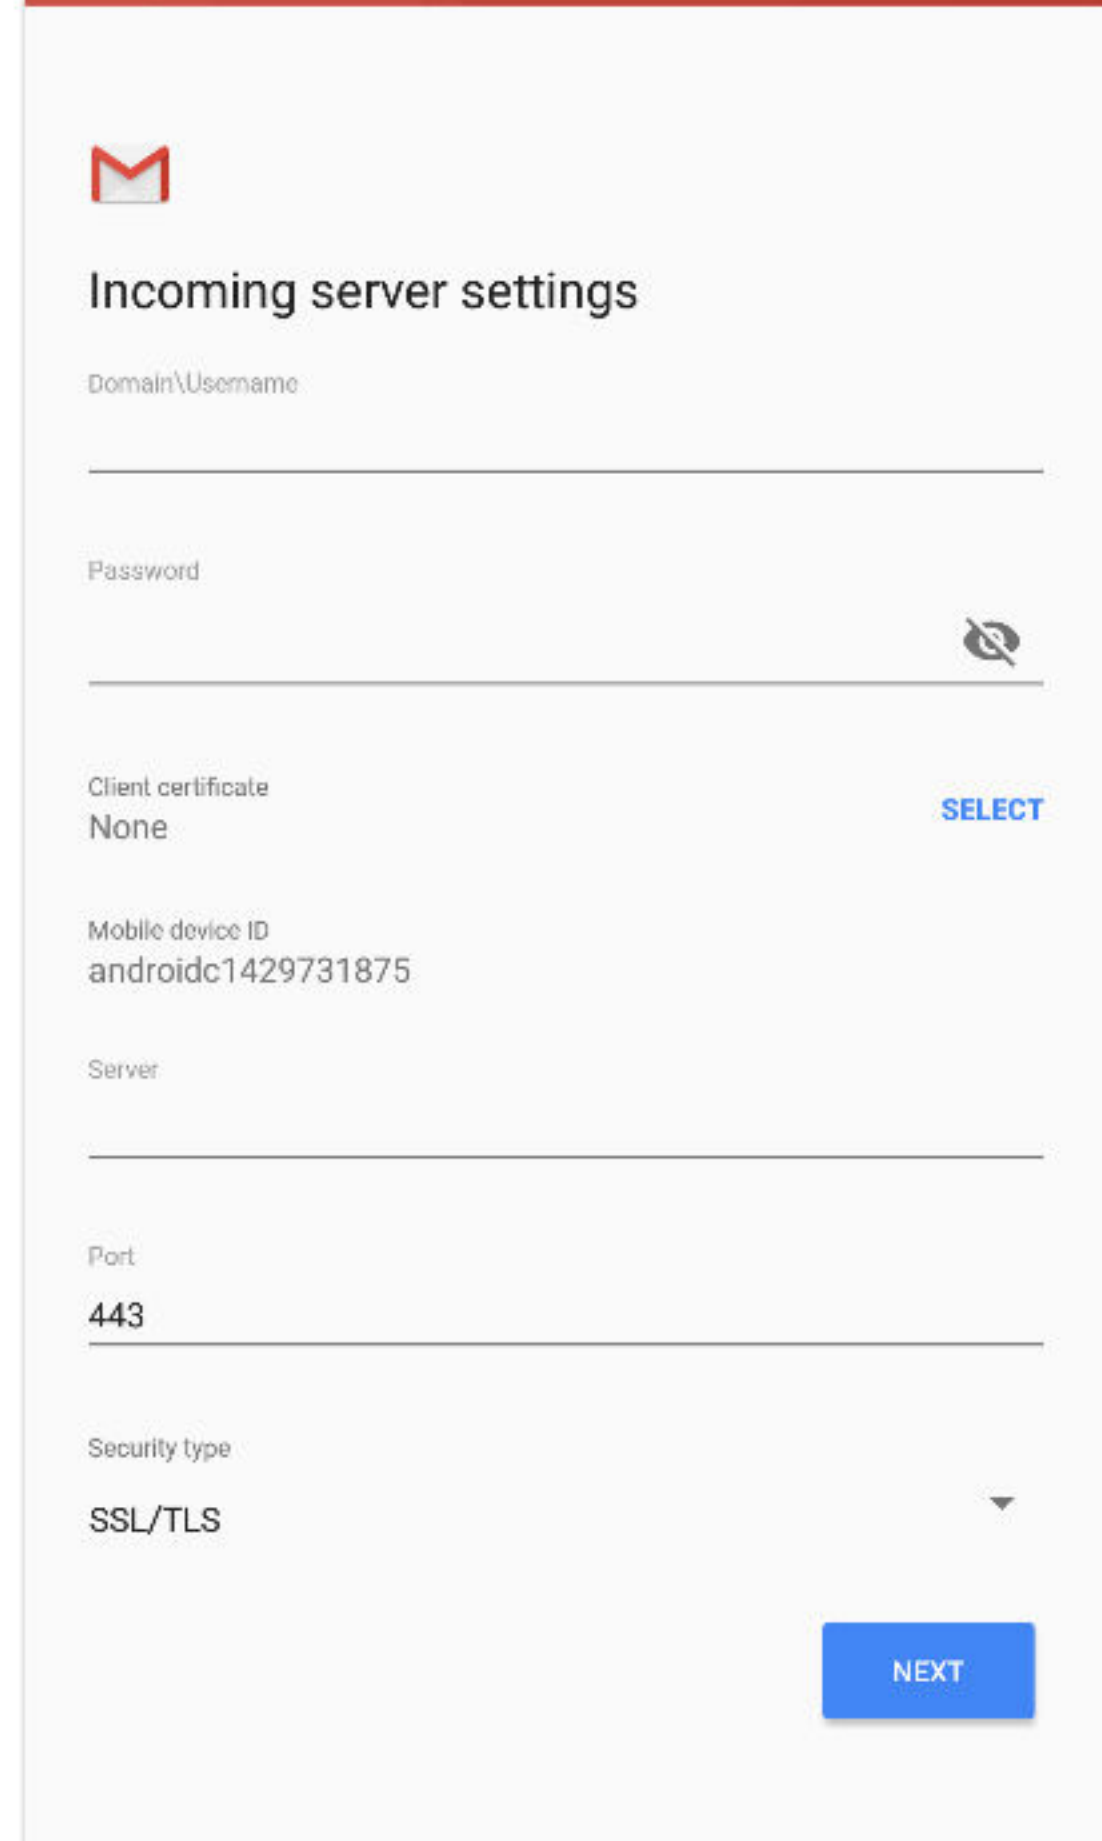

7. On the account type chooser, select **Exchange**

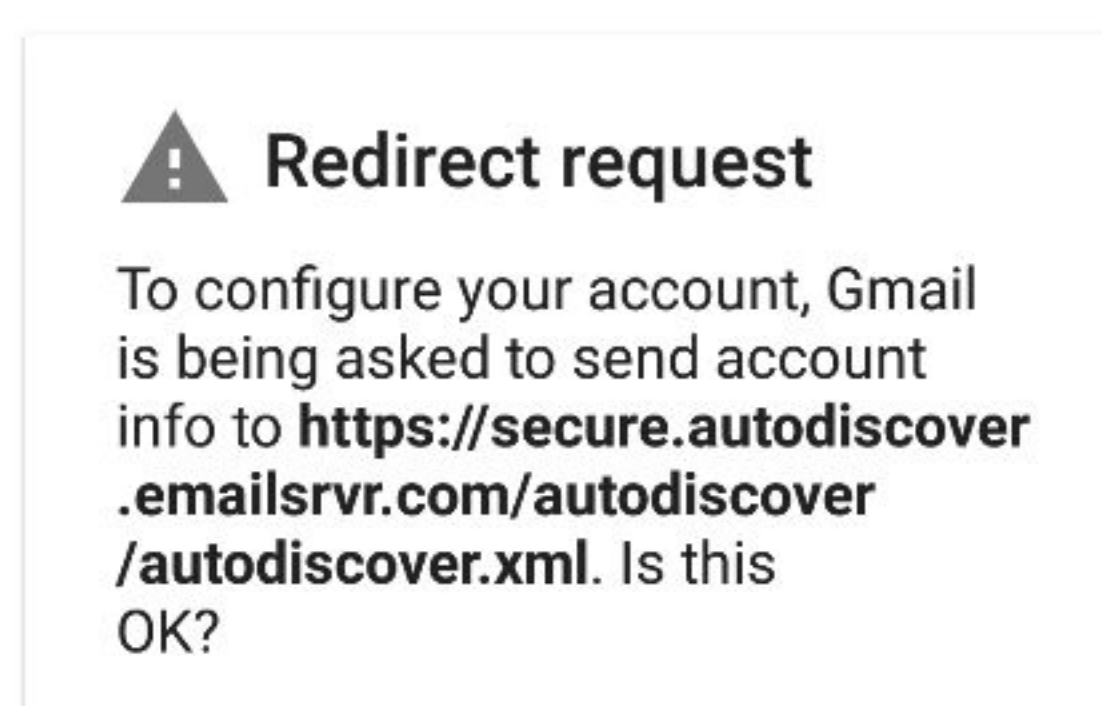

8. Enter the following settings:

Domain/username: Your email address
Password: Your mailbox password
Server: Your Exchange server
Port: 443
Security Type: SSL/TLS

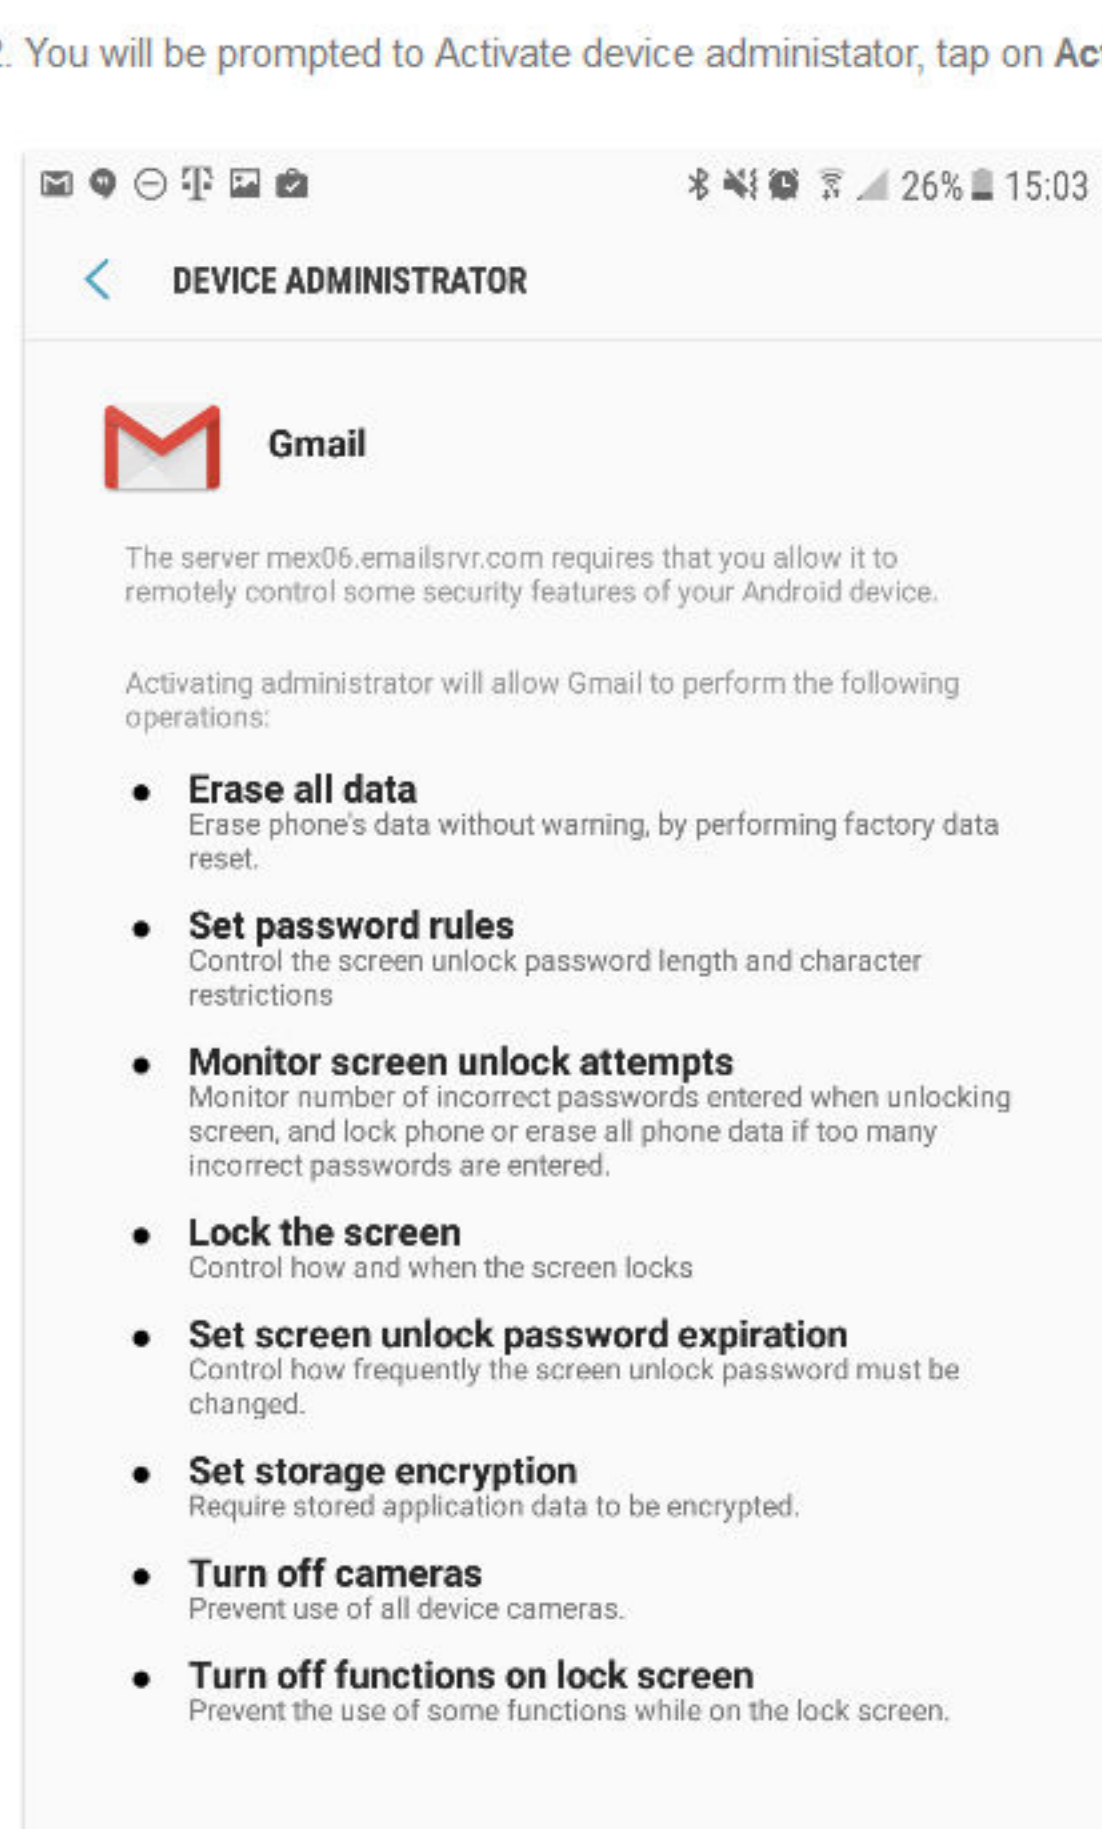

9. Tap **Next**

10. If prompted with this message, click **OK**

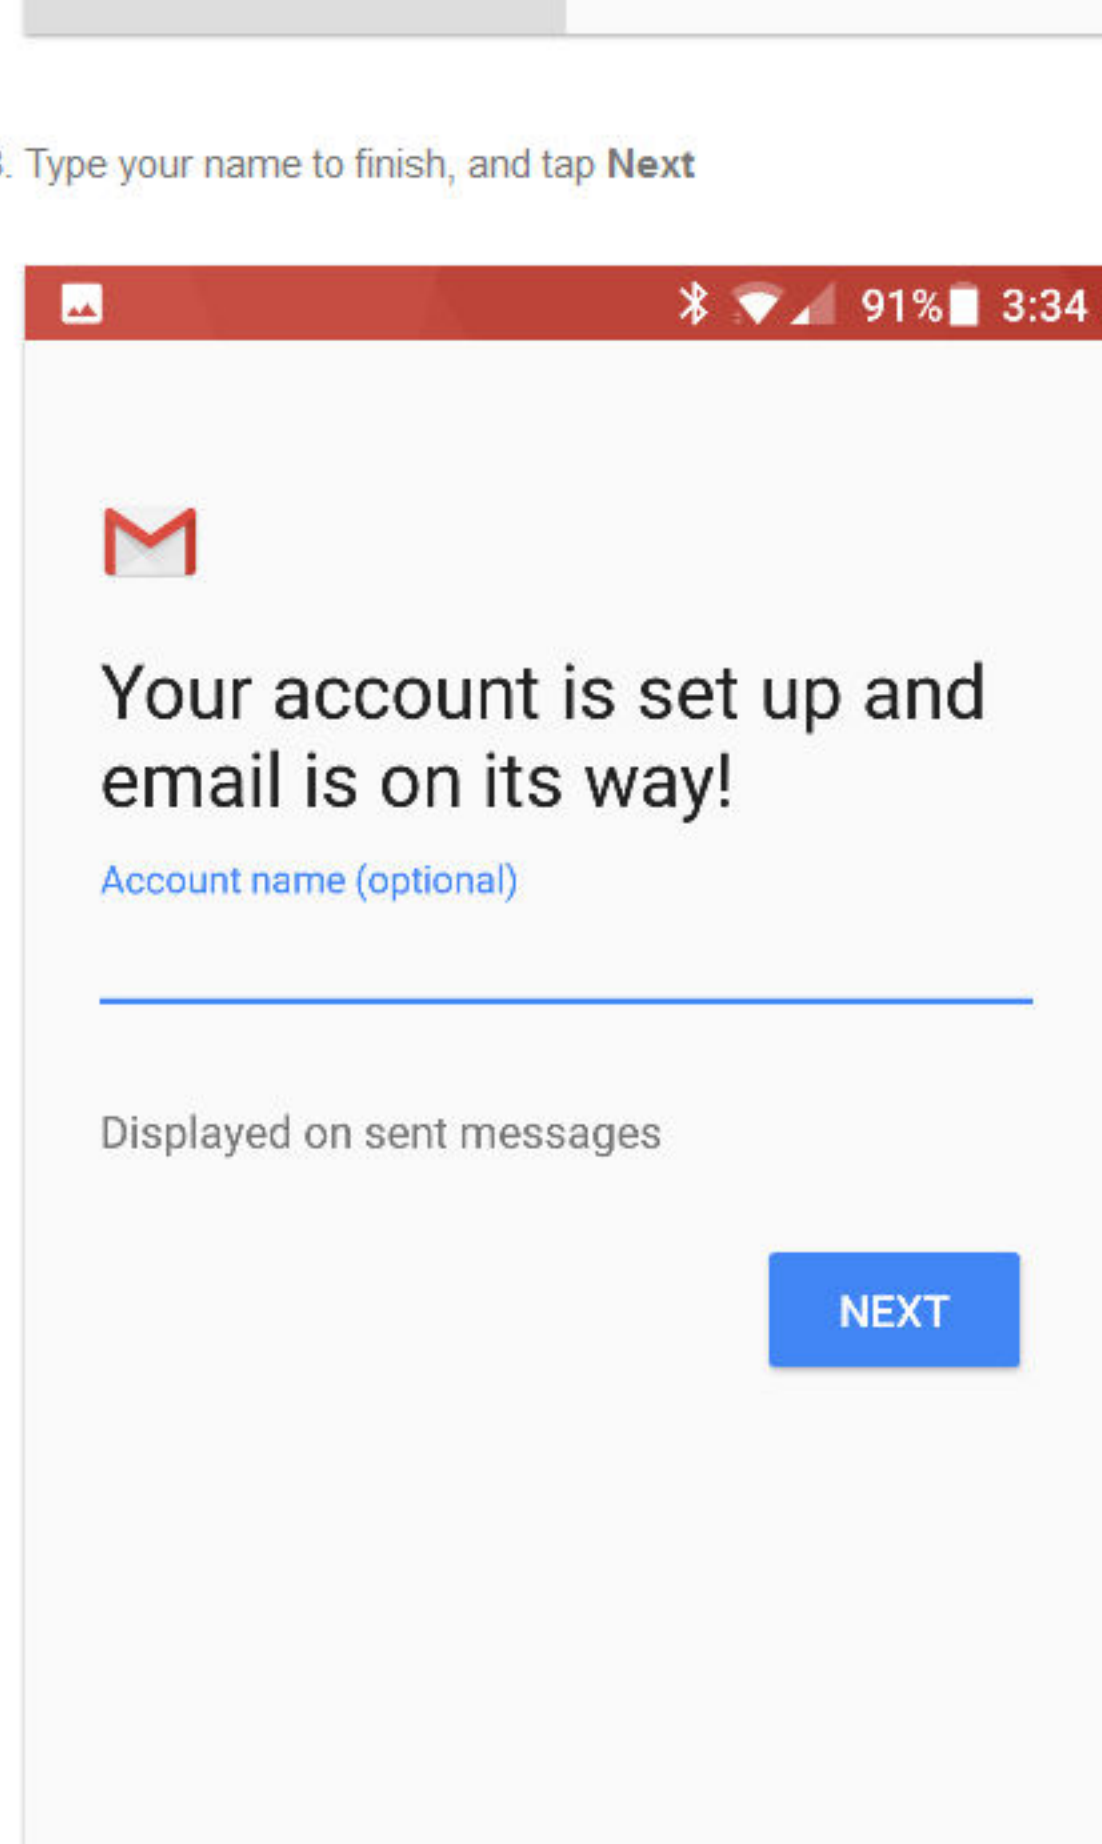

11. Tap **Next**

12. You will be prompted to Activate device administrator, tap on **Activate** at the bottom of the screen

13. Type your name to finish, and tap **Next**

14. **You are all set!** Go back to the main menu, open the Gmail app and your messages should start syncing. Please give it a few minutes to download data before troubleshooting.
